01 · ABOUT US

A personal health consultancy, built around you

> Easy Clinic Center was founded on **1 October 2020** with the mission of making a difference through pioneering practices in our sector and becoming a world health brand, guided by ethical principles, a distinguished team and a satisfaction-focused service that meets international quality standards.

We are not a hospital. We are your independent coordinator between you and Türkiye's leading hospitals. Our role is to understand your medical situation, find the right specialist and hospital, obtain transparent hospital-based prices, and then organise every part of the journey so that you can focus on your treatment and recovery.

At our partner hospitals, treatments are delivered to international standards and supported by radiological imaging and advanced laboratory services. We treat your health as we would treat our own: with specialist physicians, experienced nurses and a modern management approach, our aim is quality healthcare with one team looking after every detail.

7 days a week
08:30 – 21:00 (Türkiye time, GMT+3)

4 cities
İstanbul · Ankara · İzmir · Antalya

One consultant
from first contact to follow-up

Ethics first
transparent, hospital-based pricing

Our values

Transparency

Every price we present comes from the hospital itself. You see what is included and what is optional before you decide.

Medical integrity

Treatment decisions belong to you and your physician. We never push a procedure; if a specialist advises against treatment, we tell you.

Personal care

You have one named consultant who knows your file and is reachable seven days a week throughout your journey.

Privacy

Your medical information is shared only with the hospitals and physicians involved in your case, and only with your consent.

Why patients from the UK choose Türkiye

Türkiye has become one of the world's most visited destinations for healthcare. For patients in the UK, a few hours' flight connects them with large private and university hospitals, experienced specialists and short waiting times.

Shorter waiting times

Consultations, imaging and surgery can usually be scheduled within days or weeks rather than months.

Experienced specialists

Many of the physicians in this catalogue are professors and associate professors with academic careers.

Clear, comparable prices

Hospital-based quotes let you compare options side by side before you commit to anything.

Direct flights

İstanbul, Ankara, İzmir and Antalya are all served by flights from the UK, many of them direct.

Recovery in comfort

Hotels close to the hospital and coastal cities such as Antalya and İzmir make recovery more pleasant.

Someone on your side

With Easy Clinic Center, a consultant who speaks your language coordinates every step.

Our promise: we only work with established private and university hospitals. Every procedure in this catalogue is performed in a hospital setting by a specialist physician, never in unlicensed clinics.

03 · SERVICES

Our services in detail

Our core services cover medical guidance and treatment. Travel services are always optional and can be added to any quote.

Personal health consultancy

Your starting point. A consultant listens to your situation, reviews your existing reports and explains your options in plain language: which specialty you need, which hospitals have experience in your condition, and what the next steps would be.

- Free initial assessment of your request
- Guidance on specialty and hospital choice
- One named consultant for your whole journey

Treatment in Türkiye

Once you decide to be treated in Türkiye, we book your consultation, tests and procedure, share your file with the hospital in advance and stay with you through admission, treatment and discharge.

- Appointment planning before you travel
- Hospital admission and discharge support
- Medical reports collected for your UK GP

AI-supported second medical opinion

Get a specialist's view without travelling. Our AI-supported system prepares a structured summary of your records, a specialist at a partner hospital gives an opinion, and we send you a written report. Lengthy one-to-one appointments are not needed.

- Structured analysis of reports and imaging
- Opinion given by a specialist physician
- Clear written report with options

Plastic, reconstructive & aesthetic surgery

From rhinoplasty to body contouring and post-cancer reconstruction, we work with plastic surgeons at our partner hospitals. Pre-assessment from your photos happens before you book a flight.

- Surgeon matching and pre-assessment
- All procedures in fully equipped hospitals
- Post-operative checks and remote follow-up

Optional travel & support services

Flights

Optional. We plan flights around your treatment dates and your surgeon's advice on when it is safe to fly home.

Accommodation

Optional. Hotels close to your hospital, chosen for comfort and easy access, for you and a companion.

Transfers

Optional. Private airport, hotel and hospital transfers with a driver waiting for you on arrival.

Coordination & language support

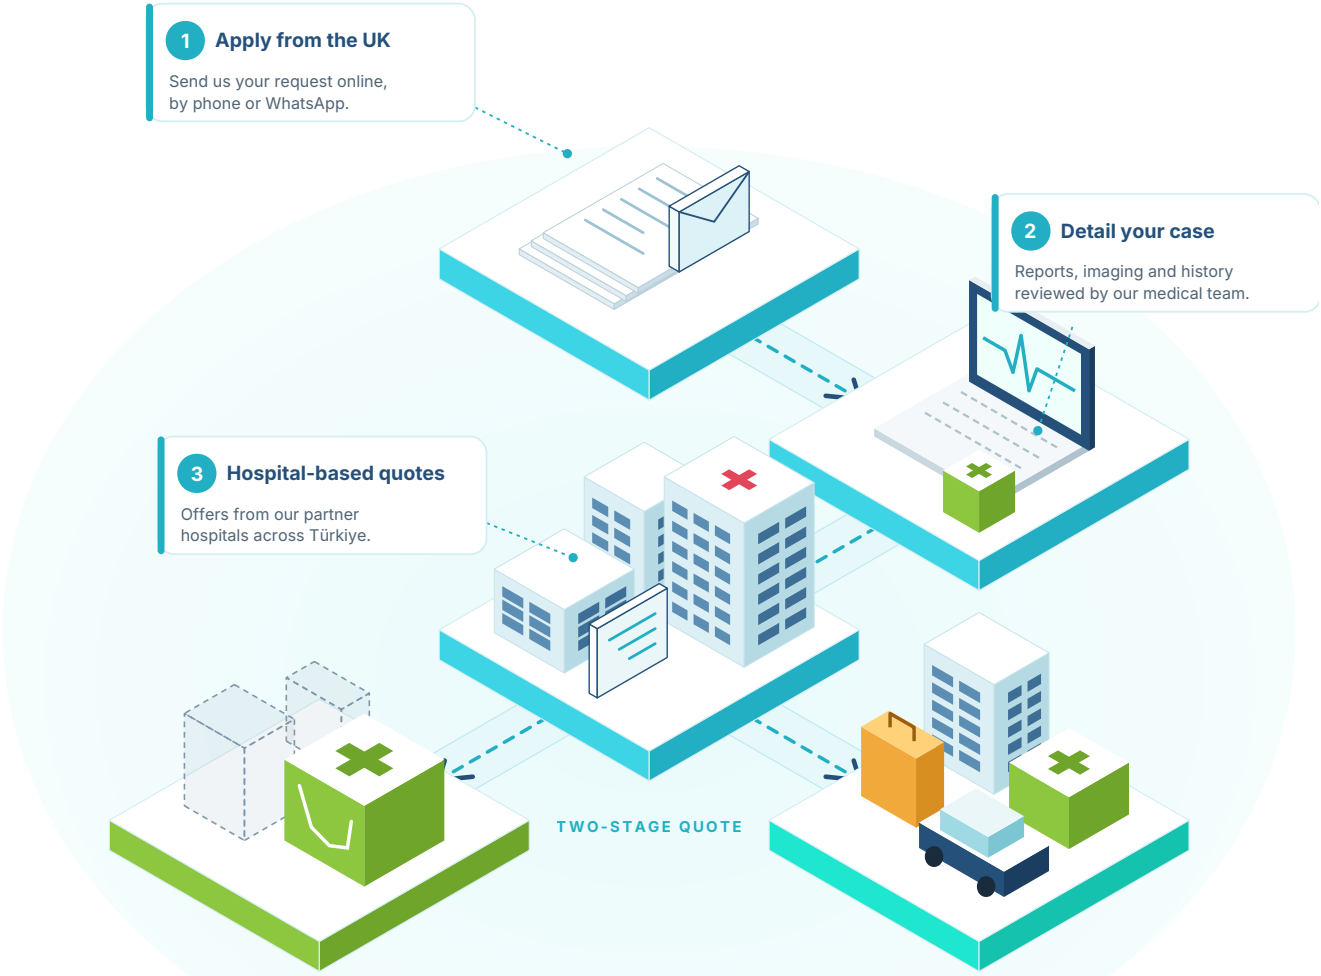

Your consultant helps you communicate with hospital staff and is reachable seven days a week, 08:30–21:00.

Aftercare & follow-up

After you return home we stay in touch, arrange remote check-ins with your physician when needed and help share reports with your UK doctor.

From the UK to treatment, step by step

The diagram shows the core of our model: you apply from the UK, we detail your health problem, and you receive hospital-based quotes from Türkiye in two forms.

OPTION B

Treatment Only

Treatment price only. Flights, hotel and transfers stay optional add-ons.

OPTION A

All-Inclusive Package

Treatment + flights + accommodation + airport & hospital transfers.

The eight steps in full

1 Apply from the UK

Contact us online, by phone or WhatsApp. Tell us briefly about your health problem and what you are looking for.

2 Detailing your medical case

We collect your reports, imaging and history and, where needed, use our AI-supported system to build a structured medical summary for the hospitals.

3 Specialist review

Specialists at suitable partner hospitals review your file and propose a treatment plan.

4 Hospital-based quotes from Türkiye

You receive a quote from each hospital, in two forms: all-inclusive (treatment, flights, accommodation, transfers) or treatment only, with the rest optional.

5 Your decision

Compare hospitals, ask questions and take your time. Nothing is booked until you confirm.

6 Planning & travel

We confirm appointments and, if you chose them, arrange flights, hotel and transfers.

7 Treatment in Türkiye

Your consultant accompanies you from arrival to discharge and keeps your family informed if you wish.

8 Home & follow-up

We send your medical reports, arrange remote check-ins and stay in touch during your recovery.

The two-stage quote, explained

For every case we prepare a separate quote for each suitable partner hospital. Each quote is offered in two forms, so you decide how much we organise.

	Option A All-inclusive	Option B Treatment only
Hospital treatment (as quoted by the hospital)	✓	✓
Specialist and surgeon fees included in the hospital quote	✓	✓
Easy Clinic Center coordination and consultant	✓	✓
Return flights	✓	optional
Hotel accommodation near the hospital	✓	optional
Airport, hotel and hospital transfers	✓	optional

What affects the price

- ✓ The hospital and the specialist you choose
- ✓ The exact procedure and technique
- ✓ Length of hospital stay and room type
- ✓ Additional tests the physician requires
- ✓ Travel dates, hotel category and companions (Option A)

Good to know

- ✓ Quotes are based on the information in your file; the final plan is confirmed after the physician examines you.
- ✓ Validity, payment terms and what happens if the plan changes are written in each offer.
- ✓ You can switch from Option B to Option A at any time before travel.

06 · SECOND OPINION

A specialist's opinion, *powered by AI*

A second opinion helps you feel confident about a diagnosis or a treatment plan. With our new AI-supported system you get a specialist physician's opinion without travelling and without lengthy one-to-one appointments: we put your case to the physician and report the answer back to you.

Upload 1
You send your reports, imaging (CD/DICOM), lab results and current treatment plan.

AI analysis 2
Our system organises the files, builds a structured summary, flags missing information and lists the key clinical questions.

Specialist review 3
A specialist at a partner hospital reviews the summary together with your original files and gives an opinion.

Written report 4
You receive the physician's evaluation and treatment options in a clear, written report.

What to send us

- ✓ Specialist letters and discharge summaries
- ✓ Imaging on CD/USB in DICOM format, plus radiology reports
- ✓ Pathology/biopsy reports, if any
- ✓ Recent blood tests
- ✓ List of current medicines and allergies
- ✓ Your own questions for the physician

What the AI does and does not do

Does: translate and organise documents, summarise your history, highlight what the specialist needs to see.

Does not: diagnose or recommend treatment. Every medical opinion in your report is given by a qualified specialist physician.

One-to-one consultation

A live video consultation is arranged only if the physician considers it necessary, for example when examination or discussion would change the opinion.

Privacy: your documents are used only to prepare your second opinion and are shared only with the physician reviewing your case.

Plastic, reconstructive & *aesthetic* surgery

Plastic surgery is one of the most requested treatments in Türkiye. Through our partner hospitals we work with plastic surgeons for both aesthetic and reconstructive procedures, always in a hospital setting with anaesthesia and intensive care support.

Face

Rhinoplasty
Reshaping the nose for appearance and/or breathing.

Face & neck lift
Tightening sagging skin and tissues of the face and neck.

Eyelid surgery
Removing excess skin or fat from upper or lower eyelids.

Otoplasty
Correcting prominent ears.

Breast

Augmentation
Increasing breast volume with implants or fat transfer.

Reduction & lift
Reducing size and/or restoring a lifted shape.

Gynaecomastia
Treatment of enlarged breast tissue in men.

Reconstruction
Rebuilding the breast after cancer surgery.

Body

Liposuction
Removing stubborn fat deposits to reshape the body.

Tummy tuck
Removing excess abdominal skin and tightening the muscles.

Brazilian butt lift (fat transfer)
Using your own fat to add fullness and shape to the buttocks.

Mummy makeover
Combined breast and abdominal procedures after pregnancy.

Reconstructive

Post-cancer reconstruction
Restoring form and function after tumour surgery.

Scar revision
Improving the appearance of scars.

Hand surgery
Treatment of injuries and conditions of the hand.

Body contouring after weight loss
Removing excess skin after major weight loss.

How a plastic surgery journey works

- You send photos and your medical history
- The surgeon reviews them and confirms whether you are a suitable candidate
- You receive a hospital-based quote (Option A or B)
- Face-to-face consultation with the surgeon before surgery
- Surgery and hospital stay as advised by the surgeon
- Check-ups before flying home and remote follow-up after

> Your surgeon will advise how long you should stay in Türkiye after your operation and when it is safe to fly. Please plan your travel with this in mind.

08 · SPECIALTIES

Medical specialties across our network

Our partner hospitals cover almost every specialty. The number next to each area shows how many physicians in this catalogue work in it.

92

Oncology & haematology

Medical and radiation oncology, haematology and bone marrow transplantation, with multidisciplinary tumour boards at the larger hospitals.

139

Heart & vascular

Cardiology, angiography, bypass and valve surgery, vascular and varicose vein treatment.

84

Orthopaedics & spine

Joint replacement including robotic surgery, sports injuries, hand surgery and spine surgery.

94

Brain & nervous system

Neurosurgery for tumours and spine, and neurology for epilepsy, migraine, stroke and movement disorders.

25

Organ transplantation & kidney

Kidney and liver transplant centres, nephrology and dialysis support.

113

Women's health & IVF

Gynaecology, high-risk pregnancy, gynaecological oncology and IVF centres.

140

General & digestive surgery

Laparoscopic and robotic surgery, obesity surgery, liver-pancreas surgery, endoscopy.

105

Eye & ENT

Cataract, retina and refractive surgery; ear, nose and throat surgery.

92

Check-up & internal medicine

Comprehensive check-up programmes, diabetes and thyroid care, internal medicine.

09 · OUR SOLUTION PARTNERS

Partner hospitals at a glance

We work with leading private and university hospitals in İstanbul, Ankara, İzmir and Antalya. Hospital names link to their section in the physician directory; the web addresses open each hospital's official physician list.

How to read the physician directory

The following pages list 1679 physicians at our partner hospitals and centres, grouped by hospital and department. Names are shown as published by each hospital; titles are explained below.

Prof. Dr.	**Professor** Full professor; the highest academic rank, typically with many years of specialist and teaching experience.
Assoc. Prof. Dr.	**Associate professor (Doçent)** Specialist who has completed the national associate professorship process.
Asst. Prof. Dr.	**Assistant professor** Specialist holding an academic faculty position at a university.
Spec. Dr.	**Specialist physician** Physician who has completed specialty training in a non-surgical field.
Op. Dr.	**Operator doctor** Specialist who has completed training in a surgical field.
Dr.	**Doctor** Physician (often emergency or general practice).
Dent. / Dr. Dent.	**Dentist** Dentist or dental specialist.

About this directory: compiled from each hospital's official website on 12 October 2026. Hospital teams change over time, so please use the hospital's link to check the latest list. Our consultants confirm availability before any appointment is booked. Inclusion in the list does not mean that a physician has a personal agreement with Easy Clinic Center. Support staff such as dietitians, psychologists and physiotherapists are not listed.

EMERGENCY MEDICINE 1

Dr. Yahya Sayal

Travelling to Türkiye for treatment

Passport & entry

According to the UK government's travel advice, British citizens do not need a visa for tourist or business visits to Türkiye and can stay up to 90 days in any 180-day period. Your passport must be valid for at least 150 days from your arrival date and have at least one blank page.

Entry for medical purposes may have separate requirements. Please check the latest rules on gov.uk and with the Turkish Embassy in London before you travel; we can help you prepare the documents.

Flights

All four cities have international airports with flights from the UK. Your surgeon decides when you can fly after treatment; we plan the return date accordingly.

Accommodation

We recommend hotels close to your hospital. Many patients bring a companion; we arrange rooms for both of you.

What to bring

- Passport and travel insurance documents
- All medical reports, imaging CDs and your medicine list
- Your regular medicines for the whole stay
- Comfortable, loose clothing for after treatment
- A UK plug adapter (Türkiye uses Type C/F sockets, 230 V)
- Some Turkish lira for small expenses; cards are widely accepted

Insurance

Standard travel insurance often excludes planned medical treatment. Ask your insurer about cover for treatment abroad and possible complications.

Time & language

Türkiye is on GMT+3 all year (2 hours ahead of the UK in summer, 3 in winter). Your consultant helps with communication at the hospital.

Your rights, privacy and our ethics

Your data

We process your personal and health data only to provide the services you ask for, in line with UK GDPR and Türkiye's personal data protection law (KVKK). You can ask what we hold about you and request its deletion.

Informed consent

Before any procedure, the hospital explains the benefits, risks and alternatives and asks for your written consent. You can ask questions and take time to decide.

Medical records

You receive copies of your reports, imaging and discharge summary to take home and share with your doctor in the UK.

No pressure

We never pressure you into treatment. Free second thoughts are part of good medicine, and you may withdraw before booking at any time.

Complaints & feedback: if anything does not meet your expectations, tell your consultant first. We will work with the hospital to resolve it and keep you informed in writing.

Frequently asked questions

Is the first assessment free?

Yes. Reviewing your request and explaining your options does not cost anything.

Can I choose my own doctor?

Yes. You can choose any physician in this directory; we check availability and ask for a quote from that hospital.

How long does it take to receive quotes?

It depends on the case and how complete your file is. Your consultant gives you an estimate once your documents are in.

What is the difference between Option A and B?

Option A includes treatment, flights, accommodation and transfers. Option B is the treatment price only; travel services can be added if you want them.

Will I speak to the physician for a second opinion?

Usually not needed: the physician reviews your file and we report the opinion to you in writing. A video consultation is arranged if the physician considers it necessary.

Does AI make medical decisions?

No. AI organises and summarises your documents. Every medical opinion is given by a specialist physician.

Can a family member come with me?

Yes, and we recommend it for surgery. We can include your companion's flights and accommodation in Option A.

What happens after I return home?

You take your reports with you, and we arrange remote check-ins with your physician and stay in touch during your recovery.

What are your working hours?

Seven days a week, 08:30–21:00 Türkiye time (GMT+3).

Which cities do you work in?

İstanbul, Ankara, İzmir and Antalya, with 14 partner hospitals and centres.

EASY CLINIC CENTER

Let's plan your care together

Send us your request and a personal consultant will get back to you.

7 days a week
08:30 – 21:00 (GMT+3)
