EASY CLINIC CENTER

TREATMENTS & CENTRES · 2026

Featured *treatments*

A selection of our treatments in plastic & aesthetic surgery, general surgery, dentistry and internal medicine, coordinated for patients from the UK by one dedicated team. For other specialties, please ask us.

AT A GLANCE

Featured treatments in this brochure

This brochure presents some of our most requested treatments; we also coordinate care in many other specialties. For each treatment we match you with an experienced specialist, obtain a hospital-based quote in two forms (all-inclusive or treatment only) and coordinate your whole journey.

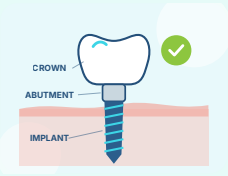

Plastic & Aesthetic Surgery

- Breast implants
- Liposuction
- Rhinoplasty

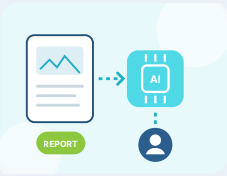

General Surgery

- Obesity surgery
- Cancer surgery
- Thyroid surgery

Dentistry

- Dental implants
- Hollywood smile

Internal Medicine

- Second medical opinion
- Chronic disease follow-up centre

1. Fill in our patient form
2. Your case is reviewed by a specialist
3. Receive hospital-based quotes
4. Treatment & follow-up

DEPARTMENT

Plastic & Aesthetic Surgery

Aesthetic and reconstructive procedures performed by plastic surgeons in fully equipped hospitals with anaesthesia and intensive-care support.

BREAST AUGMENTATION

Breast implants

Breast augmentation uses silicone implants to increase volume and improve shape and symmetry. The surgeon helps you choose the implant size, shape and placement (above or below the muscle) that suits your body.

WHO IS IT FOR?

- ✓ Women who feel their breasts are small or have lost volume after pregnancy or weight loss
- ✓ Correcting asymmetry between the two breasts
- ✓ Adults in good general health with realistic expectations

PROCEDURE	ANAESTHESIA	HOSPITAL STAY	STAY IN TÜRKIYE	BACK TO DAILY LIFE
1–2 hours	**General**	**1 night**	**About 6–7 days**	**Desk work ~1 week, sport 4–6 weeks**

Times are typical and vary from patient to patient. Your physician confirms the plan after examining you.

HOW IT WORKS WITH US

1. You send photos (without your face) and your medical history
2. The surgeon proposes an implant plan and the hospital sends a quote
3. Consultation and measurements in Türkiye, then surgery
4. Check-up before flying home; remote follow-up afterwards

BODY CONTOURING

Liposuction

Liposuction removes stubborn fat deposits that do not respond to diet and exercise, such as the abdomen, flanks, thighs, arms and chin, to reshape the body's contours. It is not a weight-loss method.

WHO IS IT FOR?

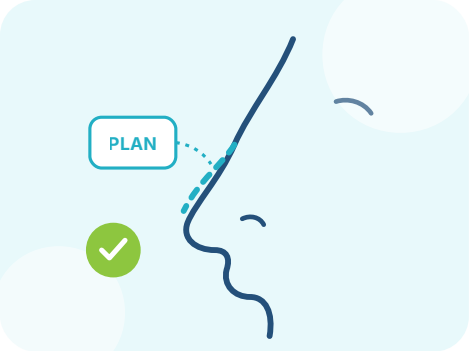

- ✓ People close to their ideal weight with localised fat deposits
- ✓ Good skin elasticity
- ✓ Can be combined with tummy tuck or fat transfer

PROCEDURE	ANAESTHESIA	HOSPITAL STAY	STAY IN TÜRKIYE	BACK TO DAILY LIFE
1–3 hours	**General or sedation**	**0–1 night**	**About 5–7 days**	**Work in 3–7 days**

Times are typical and vary from patient to patient. Your physician confirms the plan after examining you.

HOW IT WORKS WITH US

1. Photos of the areas (no face) and your weight history
2. Surgeon defines areas and technique; quote follows
3. Surgery, then a compression garment for several weeks
4. Check-up before your flight home

NOSE RESHAPING

Rhinoplasty

Rhinoplasty reshapes the nose to bring it into harmony with the face and can also improve breathing (septorhinoplasty). Open or closed techniques are planned according to your anatomy.

WHO IS IT FOR?

- ✓ Hump, wide or drooping tip, asymmetry
- ✓ Breathing problems due to a deviated septum
- ✓ Adults whose facial growth is complete

PROCEDURE	ANAESTHESIA	HOSPITAL STAY	STAY IN TÜRKIYE	BACK TO DAILY LIFE
2–3 hours	**General**	**1 night**	**About 7–8 days**	**Social life ~2 weeks; final shape up to 12 months**

Times are typical and vary from patient to patient. Your physician confirms the plan after examining you.

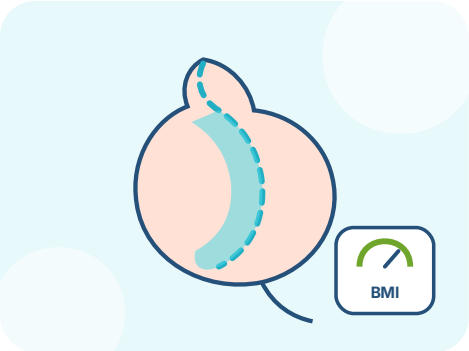

HOW IT WORKS WITH US

1. Your consultant arranges a secure way to share face photos, only with your consent
2. Surgeon assessment and quote
3. Surgery; a splint stays on for about a week
4. Splint removal in Türkiye before you fly home

DEPARTMENT

General Surgery

Laparoscopic and robotic surgery, obesity and metabolic surgery, oncological and endocrine surgery.

BARIATRIC & METABOLIC SURGERY

Obesity surgery

Obesity surgery helps people with severe obesity lose weight permanently and often improves type 2 diabetes, high blood pressure and sleep apnoea. The most common operations are sleeve gastrectomy and gastric bypass, performed laparoscopically.

WHO IS IT FOR?

- ✓ BMI of 40 or above, or 35 or above with related conditions such as diabetes
- ✓ Previous diet attempts without lasting success
- ✓ Final suitability is decided by the surgeon and anaesthetist

PROCEDURE	ANAESTHESIA	HOSPITAL STAY	STAY IN TÜRKIYE	BACK TO DAILY LIFE
1–2 hours	**General**	**2–3 nights**	**About 7–10 days**	**Work ~2 weeks; staged diet for several weeks**

Times are typical and vary from patient to patient. Your physician confirms the plan after examining you.

HOW IT WORKS WITH US

1. Your height, weight, illnesses and medicines via our patient form
2. Pre-operative tests: blood work, endoscopy, cardiology and anaesthesia review
3. Laparoscopic surgery and a few days in hospital
4. Dietitian plan and long-term remote follow-up

SURGICAL ONCOLOGY

Cancer surgery

Surgical removal of tumours of the breast, stomach, bowel, liver, pancreas and other organs, planned by a multidisciplinary tumour board together with oncology, radiology and pathology. Laparoscopic or robotic techniques are used where suitable.

WHO IS IT FOR?

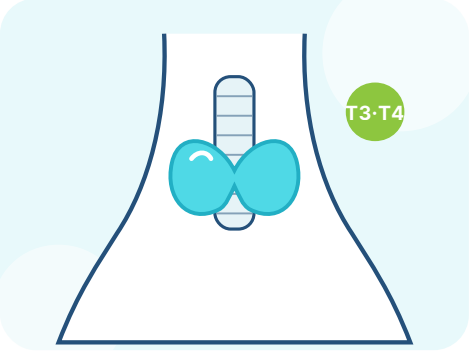

- ✓ Patients with a confirmed or suspected cancer diagnosis
- ✓ Patients wanting a second opinion before surgery
- ✓ Patients needing treatment without long waiting times

PROCEDURE	ANAESTHESIA	HOSPITAL STAY	STAY IN TÜRKIYE
Depends on the operation	**General**	**Planned individually**	**Planned individually**

Times are typical and vary from patient to patient. Your physician confirms the plan after examining you.

HOW IT WORKS WITH US

1. Send your pathology, imaging (DICOM) and reports
2. Tumour board review and treatment plan
3. Surgery, plus chemotherapy or radiotherapy if needed
4. Reports for your UK oncologist and ongoing follow-up

ENDOCRINE SURGERY

Thyroid surgery

Partial or total removal of the thyroid gland for nodules, goitre, overactive thyroid or thyroid cancer. Nerve monitoring is used during surgery to protect the voice.

WHO IS IT FOR?

- ✓ Large or growing nodules and goitre
- ✓ Suspicious biopsy results or thyroid cancer
- ✓ Overactive thyroid not controlled with medicines

PROCEDURE	ANAESTHESIA	HOSPITAL STAY	STAY IN TÜRKIYE	BACK TO DAILY LIFE
1.5–3 hours	**General**	**1–2 nights**	**About 5–7 days**	**Work in 1–2 weeks**

Times are typical and vary from patient to patient. Your physician confirms the plan after examining you.

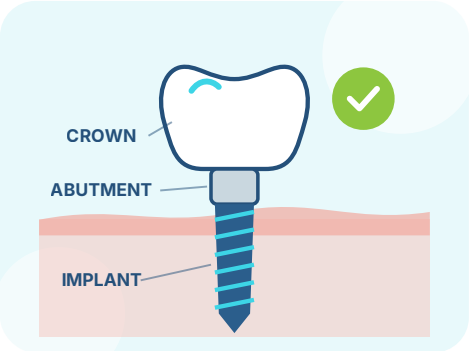

HOW IT WORKS WITH US

1. Send your ultrasound, biopsy and thyroid blood tests
2. Endocrinology and surgical review; quote
3. Surgery with voice and calcium checks
4. Pathology result and hormone plan for your GP

DEPARTMENT

Dentistry

Restoring missing teeth and designing natural, confident smiles with digital planning and modern materials.

FIXED REPLACEMENT TEETH

Dental implants

A titanium implant placed in the jawbone replaces the root of a missing tooth and carries a crown that looks and feels natural. Single teeth, bridges or full arches (for example all-on-4 / all-on-6) can be restored.

WHO IS IT FOR?

- ✓ One or more missing teeth
- ✓ Loose dentures you want to replace with fixed teeth
- ✓ Sufficient bone, or bone grafting when needed

PROCEDURE	ANAESTHESIA	HOSPITAL STAY	STAY IN TÜRKIYE	BACK TO DAILY LIFE
About 1 hour per implant	**Local (sedation optional)**	**Not required**	**Visit 1: 4–7 days · Visit 2: 5–7 days**	**Healing 3–6 months between visits**

Times are typical and vary from patient to patient. Your physician confirms the plan after examining you.

HOW IT WORKS WITH US

1. Send a recent panoramic X-ray or 3D scan (CBCT) and photos of your teeth
2. Treatment plan and quote
3. Visit 1: implants placed, temporary teeth
4. Visit 2 (after healing): permanent crowns

SMILE DESIGN

Hollywood smile

A Hollywood smile is a personalised smile design using porcelain veneers, E-max laminates or zirconia crowns to change the colour, shape and alignment of the visible teeth. Digital smile design lets you preview the result before treatment.

WHO IS IT FOR?

- ✓ Discoloured, worn, chipped or uneven teeth
- ✓ Gaps between teeth
- ✓ Healthy gums; gum treatment is completed first if needed

PROCEDURE	ANAESTHESIA	HOSPITAL STAY	STAY IN TÜRKIYE	BACK TO DAILY LIFE
2–3 sessions	**Local if needed**	**Not required**	**About 5–7 days**	**Immediately**

Times are typical and vary from patient to patient. Your physician confirms the plan after examining you.

HOW IT WORKS WITH US

1. Send smile photos and, if available, a panoramic X-ray
2. Digital smile design, number of teeth and material are agreed
3. Preparation, impressions and temporary teeth
4. Try-in and final fitting before you fly home

Porcelain / E-max
Thin, translucent, very natural look

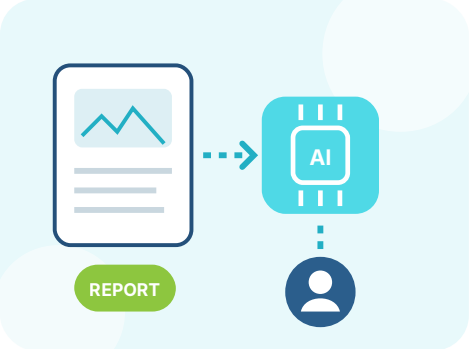

Zirconia
Very strong; suits heavier restorations

Laminate veneers
Minimal preparation of your own teeth

DEPARTMENT

Internal Medicine

Specialist opinions and long-term management of chronic conditions, without the need to travel for every step.

AI-SUPPORTED

Second medical opinion

An independent specialist opinion on your diagnosis or treatment plan. Our AI-supported system organises your records into a structured summary; a specialist physician reviews it with your original files, and we send you a written report. Lengthy one-to-one appointments are not needed.

WHO IS IT FOR?

- ✓ A new or serious diagnosis (e.g. cancer, heart disease)
- ✓ A recommended operation you are unsure about
- ✓ Treatment that is not working as expected

HOW IT WORKS WITH US

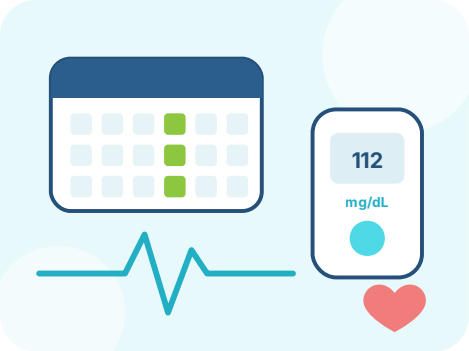

1
Upload reports, imaging and lab results

2
AI-assisted summary and key questions

3
Specialist review and opinion

4
Written report; video call only if the physician considers it necessary

AI organises and prepares your file; every medical opinion is given by a specialist physician.

LONG-TERM CARE, REMOTELY

Chronic disease follow-up centre

A structured follow-up programme for long-term conditions. Internal medicine and endocrinology specialists review your results at regular intervals, adjust your plan and send you clear reports, while you stay at home. It works alongside your GP in the UK, not instead of them.

WHO IS IT FOR?

- ✓ Diabetes and insulin resistance
- ✓ High blood pressure, heart disease, cholesterol
- ✓ Thyroid, kidney and lung conditions (asthma / COPD)

HOW IT WORKS WITH US

1
Enrolment with your history, medicines and recent tests

2
A personal follow-up calendar for tests and reviews

3
Specialist review of each set of results, AI-supported tracking of trends

4
Written reports; optional annual check-up in Türkiye

Every 3 months
Results review (e.g. HbA1c, blood pressure log)

Every 6 months
Medication and plan review

Every year
Comprehensive report; optional check-up in Türkiye

Example schedule; your specialist sets the intervals for your condition. In an emergency, always contact your local emergency services.
